

Aerial Work Platforms

Aerial Work Platform - There are many attachments used for lift trucks which can be utilized to help expand the functionality of your forklift and allow you to lift things, handle materials with less effort or to accomplish clean-up jobs.

Some attachments were particularly designed for the blades themselves. For example, fork extensions can be used if you need much more blade length, that increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are one more variety utilized whenever transporting rolled material to be able to make sure it does not roll off of the standard flat blades.

Lifting accessories can be pivoting and telescoping crane accessories. They are available in numerous kinds. These accessories are normally used for transporting metal bars, poles, lumber or whichever kind of bulky things. Additional attachments like for example various styles of hooks and hook plates are accessible to be able to carry objects making use of a sling or chain. Slab lifters and magnetic filters are other objects which can be used along with hook accessories. Slab lifters are specialized accessories which are designed for carrying various materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your forklift so as to make moving rolls of carpet much easier. The accessory connects onto the lift truck's blades and has a pole which goes through the middle of the carpet roll.

There are various types of forklift accessory utilized for facility maintenance such as snow blades. These industrial forks can be connected to front end loaders and intended for moving materials like for example dirt, and mulch as well as snow. Other common cleanup attachments comprise standard sweepers and magnetic sweepers. Standard sweepers comprise a broom that the forklift forks hook onto for sweeping large spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal debris such as on shop floors for example. Sweepers have widths up to 60 inches and this surface area makes clean up quick and easy.

Material spreaders are other attachments utilized on forklifts. These spreaders are useful for a range of applications like for instance spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Work platforms are another optional lifting accessory which numerous businesses utilize everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few units obtainable that are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location making use of the forklift. Larger platform units have extra space for employees to bring tools and other essential items meant for the task. Normally work platforms are made of steel or ploy material.
