

Toyota Forklift Parts

Toyota Forklift Part - In the U.S., Toyota Materials Handling inc., or TMHU, continues to be the best selling lift truck provider since 1992. Proudly celebrating more than 40 years of operations, the Irvine, California situated company offers a comprehensive line of quality lift vehicles. Due to their history of excellence, reliability, and durability, Toyota remains prevalent in this competitive market. Quality is the foundation of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S. are manufactured here.

Every one of Toyota's manufacturing plants within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its commitment to continuous improvement and its environmentally friendly systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70 percent less smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to produce high quality lift vehicles at the same time as providing excellent customer support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's principal lift truck supplier and is among the magazines impressive World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not many other companies and no other lift truck producer can meet Toyota's record of protecting the natural environment while concurrently advancing the economy. Environmental accountability is a fundamental feature of company decision making at Toyota and they are proud to be the first and only maker to provide UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet one more reason they remain a leader within the industry.

In 2006, Toyota released the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more elaborate 2010 emission standards. The end creation is a lift vehicle that creates 70 percent fewer smog forming emissions than the existing Federal standards allow.

Also starting in 2006, jointly with the Arbor Day Foundation, Toyota added to its commitment to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and local parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been scattered through Toyota Industrial Equipment's system of sellers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift trucks provide enhanced output, visibility, ergonomics and durability, and most importantly, the industry's leading safety technology. The company's System of Active Stability, also referred to as "SAS", helps reduce the chance of mishaps and injuries, in addition to increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability is able to discern situations that might lead to lateral unsteadiness and possible lateral overturn. When any of these factors have been sensed, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This adjusts the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding strength.

SAS was first released to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS continues to be integrated into the majority of Toyota's internal combustion machines. It is standard gear on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with mandatory operator instruction, overturn fatalities across all brands have decreased by 13.6% since 1999. Also, there have been an overall 35.5% fall in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's measure of brilliance reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training curriculum to help users meet OSHA standard 1910.178. Education courses, video tutorials and a variety of materials, covering a broad scope of subjects-from personal safety, to OSHA regulations, to surface and cargo situations, are accessible through the vendor network.

Ever since the sale of its first lift vehicle in the U.S. to the construction of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained an unbroken presence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of property.

Facilities include a National Customer Center, as well as production operations and supply centers for equipment and service parts, with the entire investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and consumers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a training center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations throughout the United States, providing the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift trucks, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall client satisfaction.
